# MWRASP Quantum Defense Platform
## Controlled Disclosure Framework for Technical Discussions

**Classification**: UNCLASSIFIED / CONTROLLED DISTRIBUTION
**Purpose**: Technical Information Disclosure Guidelines
**ITAR Status**: Commercial Technology Framework - No Export Restrictions
**Version**: 1.0 - September 2025
```

```
---
```

DISCLOSURE FRAMEWORK OVERVIEW

Purpose and Scope

This framework establishes guidelines for the controlled disclosure of MWRASP technical information during partnership discussions, maintaining intellectual property protection while enabling meaningful technical evaluation by qualified prospects.

Disclosure Levels

The framework defines five disclosure levels, each requiring appropriate qualifications and confidentiality agreements:

1. **Public Level**: General capabilities and market positioning (no restrictions)
2. **Business Level**: Detailed capabilities and business applications (NDA required)
3. **Technical Level**: Architecture and integration details (qualified technical personnel)
4. **Implementation Level**: Detailed technical specifications (strategic partners only)
5. **Proprietary Level**: Core algorithms and intellectual property (joint development partners)

```
---
```

DISCLOSURE LEVEL DEFINITIONS

Level 1: Public Disclosure

```
**Classification**: UNCLASSIFIED / PUBLIC RELEASE
**Requirements**: None - publicly available information
**Audience**: General public, media, conference presentations
```

Information Included:

- General platform capabilities and value propositions
- Market applications and use cases
- High-level architecture concepts
- Partnership opportunities and models
- Public research and development activities

Information Excluded:

- Specific technical implementations
- Performance metrics and benchmarks
- Integration requirements and procedures
- Proprietary algorithms and methodologies
- Customer information and case studies

Level 2: Business Disclosure

```
**Classification**: UNCLASSIFIED / CONTROLLED DISTRIBUTION
**Requirements**: Executed Non-Disclosure Agreement (NDA)
**Audience**: Qualified business prospects and potential partners
```

Information Included:

- Detailed capability descriptions and specifications
- Performance characteristics and benchmarks
- Competitive analysis and market positioning
- Business model and revenue projections
- Customer testimonials and case studies (with consent)
- Integration overview and requirements

Information Excluded:

- Detailed technical architecture and design
- Specific algorithms and mathematical models
- Source code and implementation details
- Proprietary research and development activities
- Detailed intellectual property information

Level 3: Technical Disclosure

****Classification**:** UNCLASSIFIED / TECHNICAL DISTRIBUTION

****Requirements**:** NDA + qualified technical personnel + legitimate business need

****Audience**:** Technical evaluators from qualified prospects

****Information Included:****

- System architecture and component interactions
- Integration requirements and APIs
- Performance specifications and testing results
- Security architecture and compliance capabilities
- Technical roadmap and development plans
- Deployment models and operational requirements

****Information Excluded:****

- Proprietary algorithms and mathematical models
- Source code and detailed implementation
- Research methodologies and techniques
- Core intellectual property and trade secrets
- Specific customer implementations and configurations

Level 4: Implementation Disclosure

****Classification**:** CONTROLLED DISTRIBUTION / STRATEGIC PARTNERS

****Requirements**:** NDA + strategic partnership interest + technical qualification

****Audience**:** Strategic partners in active partnership discussions

****Information Included:****

- Detailed technical specifications and parameters
- Implementation guidelines and best practices
- Advanced integration requirements and procedures
- Performance optimization and tuning parameters
- Detailed testing and validation procedures
- Limited access to demonstration systems

****Information Excluded:****

- Source code and proprietary implementations
- Core algorithmic intellectual property
- Research and development methodologies
- Complete system documentation and manuals
- Customer-specific implementations and customizations

Level 5: Proprietary Disclosure

****Classification**:** CONTROLLED DISTRIBUTION / JOINT DEVELOPMENT PARTNERS

****Requirements**:** Executed partnership agreement + joint development commitment

****Audience**:** Joint development partners with executed agreements

****Information Included:****

- Complete technical documentation and specifications
- Source code access for agreed collaboration areas
- Proprietary algorithms and mathematical models (shared areas only)
- Research and development methodologies and techniques
- Complete system access for joint development activities
- Intellectual property sharing for collaborative development

****Information Protected:****

- Core proprietary algorithms not included in collaboration
- Independent research and development activities
- Third-party intellectual property and licensed technology
- Customer-specific implementations and configurations
- Financial and business information not related to collaboration

QUALIFICATION REQUIREMENTS

Business Level Qualification

Minimum Requirements

- **Established Organization**: Demonstrated business presence in relevant markets
- **Legitimate Interest**: Clear business need and potential partnership opportunity
- **Resource Capability**: Adequate resources for potential partnership collaboration
- **Reference Verification**: Positive business references and reputation validation

Evaluation Process

1. **Initial Inquiry**: Preliminary discussion of business interest and requirements
2. **Qualification Assessment**: Evaluation of organization qualifications and partnership potential
3. **NDA Execution**: Execution of appropriate non-disclosure agreement
4. **Business Briefing**: Detailed business-level briefing and information sharing

Technical Level Qualification

Minimum Requirements

- **Technical Personnel**: Qualified technical staff with relevant cybersecurity expertise
- **Business Relationship**: Established business-level relationship with executed NDA
- **Technical Need**: Specific technical requirements and evaluation objectives
- **Integration Capability**: Demonstrated capability to integrate advanced cybersecurity technologies

Additional Requirements for Government/Defense

- **Security Clearance**: Appropriate security clearance for sensitive technology discussions
- **Government Authorization**: Proper government authorization for technology evaluation
- **ITAR Compliance**: Demonstrated understanding of export control and ITAR requirements
- **Facility Security**: Appropriate facility security for sensitive technology discussions

Evaluation Process

1. **Technical Personnel Validation**: Verification of technical qualifications and expertise
2. **Technical NDA**: Execution of technical-specific non-disclosure agreement
3. **Security Briefing**: Security and export control briefing for government prospects
4. **Technical Assessment**: Initial technical assessment and capability evaluation

Strategic Partnership Qualification

Minimum Requirements

- **Strategic Fit**: Clear strategic alignment and mutual partnership benefits
- **Resource Commitment**: Demonstrated commitment of resources for partnership development
- **Partnership Experience**: Successful history of strategic technology partnerships
- **Long-term Perspective**: Long-term strategic perspective on market development

Enhanced Requirements

- **Executive Sponsorship**: Executive-level sponsorship and commitment to partnership
- **Technical Integration**: Demonstrated capability for complex technical integration projects
- **Market Access**: Established market presence and customer relationships in target markets
- **Financial Capability**: Adequate financial resources for partnership investment and development

Evaluation Process

1. **Strategic Assessment**: Comprehensive assessment of strategic fit and partnership potential
2. **Partnership Framework**: Development of preliminary partnership framework and terms
3. **Due Diligence**: Mutual due diligence process for partnership qualification
4. **Partnership Agreement**: Execution of strategic partnership agreement and framework

CONFIDENTIALITY AND SECURITY REQUIREMENTS

Standard Confidentiality Requirements

Non-Disclosure Agreement (NDA) Terms

- **Information Definition**: Clear definition of confidential and proprietary information
- **Use Restrictions**: Restrictions on use of confidential information to evaluation purposes only
- **Disclosure Limitations**: Limitations on further disclosure of confidential information
- **Return Requirements**: Requirements for return or destruction of confidential materials
- **Duration**: Confidentiality obligations extending 5 years beyond termination

Security Handling Requirements

- **Access Control**: Restricted access to confidential information to qualified personnel only
- **Physical Security**: Appropriate physical security for confidential documents and materials
- **Electronic Security**: Secure electronic transmission and storage of confidential information
- **Audit Trail**: Maintenance of audit trail for access to confidential information

Enhanced Security Requirements (Government/Defense)

Personnel Security

- **Security Clearance**: Appropriate security clearance for personnel accessing sensitive information
- **Background Investigation**: Completed background investigation for key personnel
- **Foreign National Restrictions**: Restrictions on foreign national access to sensitive information
- **Periodic Review**: Periodic review and revalidation of personnel security status

Facility Security

- **Secure Facilities**: Appropriate secure facilities for sensitive information handling
- **Access Control**: Physical access control and visitor management procedures
- **Communication Security**: Secure communication facilities and procedures
- **Information Security**: Secure information handling and storage procedures

Information Security

- **Classification Handling**: Proper handling of classified or export-controlled information
- **Transmission Security**: Secure transmission of sensitive information
- **Storage Security**: Secure storage of sensitive documents and materials
- **Destruction Requirements**: Proper destruction of sensitive information when required

DISCLOSURE PROCESS AND PROCEDURES

Initial Engagement Process

Step 1: Preliminary Discussion

- **Initial Contact**: Preliminary discussion of business interest and requirements
- **Qualification Screening**: Initial screening of prospect qualifications and legitimacy
- **Information Sharing**: Sharing of public-level information and capabilities overview
- **Interest Validation**: Validation of genuine business interest and partnership potential

Step 2: Formal Qualification

- **Detailed Assessment**: Detailed assessment of prospect qualifications and requirements
- **Reference Verification**: Verification of business references and reputation
- **Capability Evaluation**: Evaluation of technical and business capabilities
- **Partnership Assessment**: Assessment of potential partnership models and benefits

Step 3: Confidentiality Agreement

- **NDA Preparation**: Preparation of appropriate non-disclosure agreement
- **Legal Review**: Legal review and negotiation of NDA terms and conditions
- **Agreement Execution**: Formal execution of confidentiality agreement
- **Compliance Briefing**: Briefing on confidentiality requirements and procedures

Technical Disclosure Process

Step 1: Technical Qualification

- **Personnel Verification**: Verification of technical personnel qualifications and clearances
- **Technical Assessment**: Assessment of technical requirements and evaluation objectives
- **Integration Capability**: Evaluation of technical integration capabilities and requirements

- **Security Requirements**: Assessment of security requirements and compliance capabilities

Step 2: Technical Briefing Preparation

- **Information Package**: Preparation of appropriate technical information package
- **Presentation Materials**: Development of technical presentation materials and demonstrations
- **Security Review**: Security review of technical information and materials
- **Compliance Verification**: Verification of export control and ITAR compliance

Step 3: Technical Information Sharing

- **Secure Environment**: Conduct technical briefing in appropriate secure environment
- **Qualified Personnel**: Limit access to qualified and cleared personnel only
- **Documentation Control**: Maintain strict control of technical documentation and materials
- **Audit Documentation**: Document all access to technical information for audit purposes

Partnership Development Process

Step 1: Strategic Framework Development

- **Partnership Model**: Development of appropriate partnership model and structure
- **Business Terms**: Development of preliminary business terms and conditions
- **Technical Scope**: Definition of technical scope and collaboration areas
- **Legal Framework**: Development of legal framework for partnership collaboration

Step 2: Due Diligence Process

- **Technical Due Diligence**: Comprehensive technical due diligence and assessment
- **Business Due Diligence**: Business and financial due diligence process
- **Legal Due Diligence**: Legal and intellectual property due diligence
- **Risk Assessment**: Comprehensive risk assessment and mitigation planning

Step 3: Partnership Agreement

- **Agreement Negotiation**: Negotiation of comprehensive partnership agreement terms
- **Legal Documentation**: Development of comprehensive legal documentation
- **IP Framework**: Development of intellectual property sharing and protection framework
- **Implementation Planning**: Detailed planning for partnership implementation and execution

INTELLECTUAL PROPERTY PROTECTION

Standard IP Protection Measures

Documentation Control

- **Version Control**: Strict version control for all technical documentation and materials
- **Access Logging**: Comprehensive logging of all access to proprietary information
- **Distribution Tracking**: Tracking of all distribution of confidential materials
- **Return/Destruction**: Verification of return or destruction of confidential materials

Legal Protection

- **Copyright Notices**: Appropriate copyright notices on all proprietary materials
- **Trade Secret Protection**: Trade secret protection for proprietary algorithms and methods
- **Patent Protection**: Patent protection for novel and proprietary innovations
- **Licensing Terms**: Clear licensing terms for any shared intellectual property

Enhanced IP Protection (Strategic Partnerships)

Shared Development Framework

- **IP Ownership**: Clear definition of intellectual property ownership for joint developments
- **Licensing Rights**: Definition of licensing rights and royalty obligations
- **Improvement Rights**: Rights to improvements and derivative works
- **Commercialization Rights**: Rights to commercialize jointly developed technology

IP Audit and Compliance

- **Regular Audits**: Regular audits of intellectual property use and compliance
- **Compliance Monitoring**: Ongoing monitoring of intellectual property compliance
- **Violation Response**: Procedures for responding to intellectual property violations
- **Dispute Resolution**: Mechanisms for resolving intellectual property disputes

COMPLIANCE AND EXPORT CONTROL

ITAR and Export Control Compliance

Technology Assessment

- **ITAR Classification**: Assessment of technology for potential ITAR classification
- **Export Control Review**: Review of technology for export control implications
- **License Requirements**: Determination of any required export licenses
- **Distribution Restrictions**: Appropriate restrictions on international distribution

Compliance Procedures

- **Personnel Training**: Training of personnel on export control requirements
- **Compliance Monitoring**: Ongoing monitoring of export control compliance
- **Violation Reporting**: Procedures for reporting potential export control violations
- **Regulatory Updates**: Monitoring and implementation of regulatory updates

International Partnership Considerations

Foreign Partner Requirements

- **Technology Security Plan**: Development of technology security plan for foreign partners
- **Access Restrictions**: Appropriate restrictions on foreign national access
- **Information Segregation**: Segregation of export-controlled information
- **Compliance Verification**: Verification of foreign partner export control compliance

Government Notification Requirements

- **CFIUS Considerations**: Assessment of potential CFIUS notification requirements
- **Government Reporting**: Appropriate government reporting of international partnerships
- **Security Review**: Government security review of international technology sharing
- **Ongoing Compliance**: Ongoing compliance with government security requirements

CONTACT AND ADMINISTRATION

Disclosure Administration

- Process**: All disclosure activities administered through authorized disclosure officers
- Requirements**: Proper qualification and approval required for all information sharing
- Documentation**: Comprehensive documentation of all disclosure activities and agreements

Export Control Administration

- Process**: Export control review required for all international information sharing
- Requirements**: Proper export control assessment and approval for international activities
- Compliance**: Ongoing compliance monitoring and reporting of international activities

IMPORTANT: This framework ensures appropriate protection of intellectual property while enabling meaningful technical evaluation by qualified prospects. All disclosure activities must comply with this framework and applicable legal requirements.

Framework for controlled technical information disclosure

Maintains IP protection while enabling partnership development
